order_analysis.py

#course_end project: Analyzing customer order using python

1. Initial Data setup

customer_names = ["Alice", "Bob", "charlie", "David", "Eva"]

order_details = [

("Alice", "laptop", 120.00, "Electronics"),

("Bob" , "Smartphone", 80.00, "Electronics"),

("Charlie", "Book", 15.50, "Books"),

("David", "Jacket", 45.00, "Clothing"),

("Eva", "Headphones", 25.00, "Electronics"),

("Alice", "Mouse", 12.00, "Electronics"),

("Charlie", "pen pack", 4.50, "Books")

]

print("--- Customer Order Analysis---")

Customer Order Analysis---

[10]:

2. Calculate total Revenue

total_revenue = sum(order[2] for order in order_details)

print(f"Total revenue Generated: \${total_revenue:.2f}")

Total revenue Generated: \$302.00

[12]:

#3. Analyze spending per customer

customer_spending = {}

for name in customer_names:

Initializing spending for each customer

customer_spending[name] = 0

for name, product, price, category in order_details:

if name in customer_spending:

customer_spending[name] += price

Notebook🔗Python (Pyodide)⚡

```
customer_spending[name] = 0

for name, product, price, category in order_details:
    if name in customer_spending:
        customer_spending[name] += price

print("\nspending per customer:")
for customer, amount in customer_spending.items():
    print(f" - {customer}: ${amount:.2f}")

spending per customer:
- Alice: $132.00
- Bob: $80.00
- charlie: $0.00
- David: $45.00
- Eva: $25.00

[13]: #4. Find the highest spender
top_spender = max(customer_spending, key=customer_spending.get)

print(f"\ntop spender: {top_spender} (${customer_spending[top_spender]:.2f}")

top spender: Alice ($132.00

[15]: #5. Filter orders by category (e.g, Electronics)
target_category = "Electronics"
print(f"\norders in '{target_category}':")
for name, product, price, category in order_details:
    if category == target_category:
        print(f" - {name} bought a {product} for ${price:.2f}")

orders in 'Electronics':
- Alice bought a laptop for $120.00
- Bob bought a Smartphone for $80.00
- Eva bought a Headphones for $25.00
- Alice bought a Mouse for $12.00
